# Princess Seamed Dress- 302

## Read Me First

Your download is made up of:

**Cover, Guide Sheet , Copy Shop Pattern,** and a folder with **Pattern Tiles**.

The **Pattern Tiles** folder holds the pages (also called tiles ) that you will print on your home printer. There are 3 files in this folder for sleeves, sides and front & back sections of the dress pattern. The files have been broken down like this to make printing and assembling a large pattern more manageable.

To have your pattern printed on a large format printer, use the **CopyShop** file. In the Copy Shop file, all the pattern pieces are laid out to fit a 36 inch wide sheet of paper. You can view the dimensions by opening the file in Adobe Reader.

### To print Pattern Tiles on your home printer:

Load letter size (8 1/2 x 11 inch) paper into your printer.

Using **Adobe Reader** open the folder, Pattern Tiles, then one by one, open and print each of the **302 pattern sections**.

You can scroll to see all the pages that will make up your pattern.

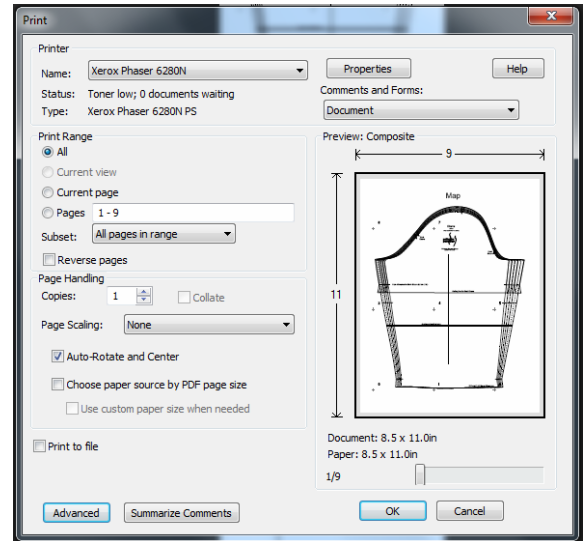

To print the pattern tiles, click the printer icon.

A dialogue box will open.

Under **Print Range** click **ALL**.

At **Page Scaling** choose either **NONE** or **100%**

In **Properties** choose **PORTRAIT**.

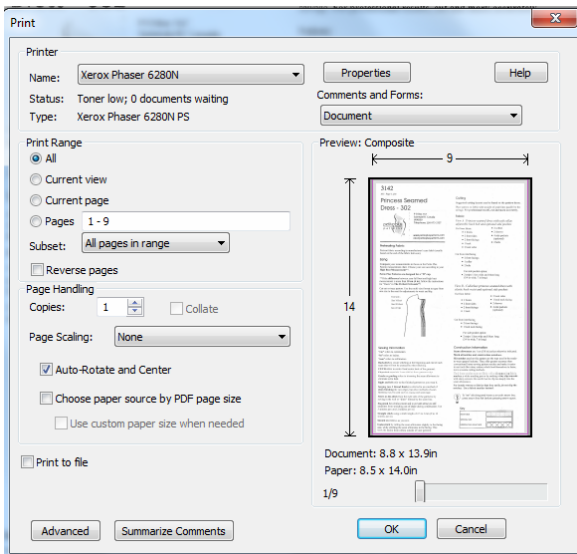

When assembling your pattern, refer to the **Map** in each section. Note that your first page (or tile), sits at the bottom left corner and is identified with a **"0"**.

Position each page with its number at bottom left.

To connect adjoining pages accurately, use an awl or other pointed tool to overlap and punch so that the **"+"** shown close to each corner sit one on top of the other exactly.

Use pattern weights to hold pages in place as you secure them with tape.

### Guide Sheet

Open the file, **302Guide** in **Adobe Reader**.

Read the instructions directly from your monitor or print the pages.

**For full-size, print on legal size (8 1/2 x 14 ") paper.**

You may also use letter size paper but your text and diagram size will be reduced.
